I am a fourth-year student majoring in Computer Networks and Data Communications at VNU University of Engineering and Technology. I consider myself a dedicated learner with strong attention to detail and diligence in both academics and work. Currently, I am seeking opportunities as a Cloud Engineer to apply and expand my expertise in cloud infrastructure, networking, and distributed systems.

Education

2023 — 2027 • **VNU University of Engineering and Technology.**
Major: Computer Networks and Data Communications.
Student Researcher at SATLab.
GPA: 3.55/4.0.

2020 — 2023 • **Ha Long High School for Gifted Students.**
Major: Physics.
Xando Model United Nations (XMUN) - Club President (2021-2022).
Third prize for excellent students at the province level in physics.

Research Experience

at SATLab

2026 • **Continuity-First Lexicographic Optimization for Home-Care Resource Allocation**
Accepted at the 12th International Conference on Intelligent Information Technology (ICIIT 2027).
Introduced **LEX-COS**, a lexicographic MaxSAT model for HCORAP prioritizing continuity of care and overtime minimization before caregiver-service compatibility.

2025 — 2026 • **SAT-driven Optimization for Robotic Assembly Line Balancing (RALB)**
Proposed an innovative SAT-based approach to the **Robot Assembly Line Balancing** problem.

Skills

Coding • C++, Python, Java

Databases • MySQL, Redis

Cloud & DevOps • Git, Linux, Docker, Kubernetes, AWS, OpenStack, VictoriaMetrics, Grafana

Soft Skills • Teamwork, Problem Solving, Adaptability

Projects

2026 • **OpenStack OVN & Load Balancer Monitoring | Cloud Engineer**
Viettel Digital Talent 2026.
Developed an observability solution for **OpenStack OVN** and **OVN Load Balancers** to resolve network monitoring and management gaps. Deployed metric exporters, processed telemetry via **VictoriaMetrics Agent**, and established automated alerting with comprehensive **Grafana** dashboards.

2025 • **Caroud | Project Manager & Solution Architect**
Spearheaded the development of a high-availability, cloud-native Caro game. **Architected** the system on **AWS** using a microservices approach to ensure scalability. Managed a team of four, overseeing the full SDLC as part of the UET Cloud Computing course.

2024 • **Library Management System | Frontend Developer**
Engineered an intuitive user interface using **JavaFX** and **CSS**, integrated with a **MySQL** database for efficient data persistence. Collaborated in a team of three to implement core OOP principles.

2023 • **Defend the Kingdom | Full-stack Developer**
Developed a robust 2D tower defense game from scratch using **C++** and **SDL2**. Implemented complex game logic, demonstrated advanced memory management and performance optimization techniques.

Awards and Certificates

2026 • **Viettel Digital Talent 2026**, Cloud Track.
• **TOEIC Listening & Reading**, Score: 930/990.

2024, 2025 • **Scholarship for Academic Excellence**, VNU-UET.

2025 • **AWS Academy Cloud Foundations**.
• **Internet of Things course**, Samsung Innovation Campus.

2024 • **HackerRank Certificates**, Problem Solving, Java, and SQL (Basic).
